

LOS ANGELES & SAN GABRIEL RIVERS WATERSHED COUNCIL  
111 NORTH HOPE STREET, SUITE 627 LOS ANGELES, CA 90012  
VOICE: 213-367-4111 FAX: 213-367-4138  
[www.lasgrwc.org](http://www.lasgrwc.org)

**NEXT MEETING: February 19, 9:30 Sharp at LA County Public Works**  
**AGENDA: SC Compass Visioning, Cost of Stormwater Treatment (USC & CalEPA)**

This month's meeting was a joint meeting of the WRP LA County Task Force and the Watershed Council stakeholders group.

**MINUTES, January 15, 2003**

We are now able to distribute these minutes by e-mail within a week of the meeting. Those people on our e-mail list will also receive a draft agenda about a week ahead of time. You may register to be included on our e-mail list-serve through <[info@lasgrwc.org](mailto:info@lasgrwc.org)>.

**Arthur Golding chaired the meeting. He read the mission statement.**

**Greetings, the minutes of the December 18<sup>th</sup> meeting were approved.**

**Executive Director's Report – Rick Harter**

New Office Space – For the past few months Rick has been looking for office space, since our lease with DWP has expired. We still have not found our new home yet.

New Web Site Look – We are going to launch our improved web site within the next month, Rick reported. The address [www.LASGRWC.org](http://www.LASGRWC.org) remains the same.

Comments on Draft Strategy for Developing TMDLs Standards due end of February – The Regional Board and EPA began discussions with interested parties about the scope and content of their newly drafted Strategy for Developing TMDLs Standards document. The first workshop was held in December 2002. Our Water Quality Committee took on reviewing the Draft and submitting comments. The next Committee meeting is scheduled for February 11. There will be a subsequent meeting by the end of February to finalize proposed comments.

Sub-Watershed Management Plans Informational Workshop – We had planned to hold this workshop at the end of January. Per participants' request, the workshop has been postponed until February 21<sup>st</sup>.

Stormwater Management Workshop – We are also planning to organize a Stormwater Management workshop in the near future, Rick reported.

Beneficial Uses Book available for pick up -- Our second publication is available for pick up. Call the office to request a copy. There is a \$5 charge to have them mailed out.

**County DPW Watershed Division Update** – Terry Grant reported on the Division's current activities:

- There will be less funds available for the LAR Master Plan due to cuts in the state budget.
- They have been working with Ellen Mackey on the landscape guidelines.
- San Gabriel River Master Plan stakeholders' meeting is scheduled for January 27th.
- They have been hosting workshops for the Dominguez Channel Watershed Area Plan.

**Workshops:**

**Funding Sources and Opportunities 2003** – Mary Loquvam thanked everybody for attending the meeting and introduced the speakers: Shirley Birosik, Staff Environmental

Scientist with the Regional Water Quality Control Board -Los Angeles Region. Shirley has worked for the Regional Board for 16 years. She has a BS in Zoology and an MS in Biology; Karen Bane, Project Manager for the South Coast Program of the Coastal Conservancy, helps develop, fund, and implement the Wetlands Recovery Project (WRP) projects. Previously, Karen has worked as an Environmental Scientist for Tetra Tech and as a Research Associate for a non-profit environmental law firm; Susan Woolam is an Environmental Specialist for the State's Department of Water Resources. Since November of 2002, Susan has played two roles: Watershed Coordinator for the Southern District and Coordinator of Southern District for the Department's Urban Streams Restoration Program; Steve Aceti is a lawyer/lobbyist who has been the Executive Director of the California Coastal Coalition (CalCoast) since 1998. He is a member of the WRP Public Advisory Committee and the Coastal Sediment Management Working Group, formed two years ago by the Resources Agency and the U.S. Army Corps of Engineers; Mary Larson is the Southern California Coordinator for the Department of Fish and Games' Fishery Restoration Grants Program. Mary is a Senior Fishery Biologist Specialist based out of Los Alamitos. She represents the grant program in the five Southern California coastal counties; Enrique Arroyo is the Deputy Executive Officer of the Rivers and Mountains Conservancy. He also manages the Prop. 40 grant program.

**Shirley Birosik** summarized Regional Board's individual upcoming grant programs as follows: Prop. 13: Non Point Source (NPS), Coastal NPS, and Watershed Protection; Prop. 40: NPS – many similarities to Prop. 13 NPS, Agricultural – for monitoring, research, and construction of improvements, Urban Stormwater – for dry weather flow diversions, acquisition and development of constructed wetlands, implementation of BMPs required by the new stormwater permits; CWA 319 (h): NPS; and CalFed: Drinking Water and Watershed Protection. Most of the moneys would need to go to on-the-ground projects (not planning) that deal with non-point source pollution (with some exceptions). Proposals may be solicited through a consolidated RFP, which will be released in January by the State Board. Subsequently, State and Regional Boards will hold consultation workshops. Applicants are encouraged to consult with the Regional Boards. Applications should be submitted to the State Board and will be reviewed for eligibility and completeness. Proposals will be ranked by the Regional Boards, and a statewide or area wide rank list will be developed. Comments will be solicited at workshops, and the list will be adopted by the State Board at a public hearing. Contracts will be written through the State Board but managed by the Regional Boards.

Shirley pointed out the importance of meeting the eligibility requirements and all selection criteria. A good proposal is considered to be the one that can improve water quality and demonstrate it did so, deals with high priority (high priority from the State/Regional Board perspective) water quality problems, fits into the bigger watershed picture and creates partnerships with watershed stakeholders. Applicants should communicate with the appropriate agency person throughout the application process.

Shirley encouraged interested parties to visit CA watershed funding site at [http://watershed.ecst.csuchico.edu/new\\_spin/spinmain.asp](http://watershed.ecst.csuchico.edu/new_spin/spinmain.asp), and also Regional Board's site at

[http://www.swrcb.ca.gov/rwqcb4/html/programs/regional\\_programs.html#Watershed](http://www.swrcb.ca.gov/rwqcb4/html/programs/regional_programs.html#Watershed)

Shirley Birosik can be contacted at 213-576-6679 or [sbirosik@rb4.swrcb.ca.gov](mailto:sbirosik@rb4.swrcb.ca.gov).

**Karen Bane** described Coastal Conservancy's funding programs. The Public Access program provides capital funds and technical assistance for the construction of public accessways and trails, including limited mobility access projects, interpretive signs and other facilities that serve state and regional coastal access needs, and for the acquisition of interests in land necessary to enable the provision of access facilities.

The Resource Enhancement program provides capital funds and technical assistance for the preservation, enhancement, and restoration of wetlands, watersheds, riparian corridors, and other wildlife habitat lands, including acquisition of interests in

land, and for technical and scientific services necessary to design and implement such projects. The WRP is a component of this program.

The Urban Waterfront program provides capital funds and technical assistance to protect, restore and expand coastal-dependent recreational, commercial, and industrial facilities and to expand opportunities for public access and use of urban waterfronts in conjunction with new development.

The Non Profit Organization Assistance program provides capital funds and technical assistance to non profit and conservation organizations to aid them in implementing Conservancy projects and in developing cost-effective local management of resource land and public access facilities. The Conservancy has joined in partnerships with local land trusts and other non profit groups, making local community involvement an integral part of the Coastal Conservancy's work.

The Conservancy does not have a formal grant process. Applicants are encouraged to contact program managers and share project ideas. Program managers would determine project eligibility and provide guidance in grant writing.

Karen described the WRP as a partnership of 17 state and federal agency working closely with local government, business, and the environmental community to implement a regional wetlands recovery strategy for coastal Southern California (from Point Conception to the Mexican border). The WRP funds acquisition, restoration, and enhancement projects in coastal wetlands and coastal watersheds in So California. Potentially, it will fund all phases of project development and implementation, including planning, environmental review, permitting and construction. The WRP provides grants to government agencies and non profit organizations. There is no maximum limit on the grant amount, and there is no limit on the number of grant applications submitted. The WRP prefers to fund projects that have been identified as a priority either in a resource management plan or by a resource management agency.

High priorities for WRP include: acquisition and restoration of tidal wetlands and contiguous transitional and upland habitat, acquisition and restoration of floodplain habitat, acquisition and restoration of riparian areas that contribute significantly to watershed functioning, restoration of ecological functions in coastal watersheds (e.g., reconnection of stream corridor to floodplain, stream stabilization, invasive species management, etc.)

WRP has two avenues of funding, WRP Work Plan and the Small Grants Program.

The Work Plan is a list of candidate acquisition, restoration, and enhancement projects that is adopted by the WRP on a yearly basis. A project must be on the Work Plan to be eligible for funding. Once a project is placed on the Work Plan, Coastal Conservancy staff will work with proponents of candidate projects to further develop and refine the project scope and identify additional funding sources. When the project is ready to be implemented a recommendation will be made to the Coastal Conservancy Board to award a grant to the project. The WRP solicit project proposals for the Work Plan once a year. The next round of proposals will be solicited in the summer.

The WRP Small Grants Program provides funding for community-based restoration projects in coastal wetlands and watersheds in the region. The purpose of this program is to further the goals of the WRP regional strategy, build local capacity to plan and implement wetlands restoration projects, promote community involvement in wetlands restoration activities, and foster education about wetlands ecosystems. The maximum amount awarded to a project is \$30,000. Non profit organizations and local agencies are eligible to apply. WRP Small Grants are awarded on an annual basis. The next round of applications is due March 7, 2003. Applications are available on WRP web site at <http://www.coastalconservancy.ca.gov/scwrp/>.

**Susan Woolam** presented Dept. of Water Resources' two grant programs: Flood Corridor Protection and Urban Streams Restoration. Available funds in 2003 for the Flood Corridor Protection program amount to \$30 million but can't exceed \$5 million per grant.

Only local agencies and non governmental organization (partnerships encouraged) are eligible to apply. Projects that deal with non structural flood protection that also preserves or enhances wildlife habitat and/or agricultural lands in the 100-year floodplain would qualify for funding.

Application dead line for 2003 grant cycle is February 14, 2003.

Projects funded in 2002 were mostly acquisitions that also enhanced habitat, groundwater recharge or promoted wildlife friendly agricultural practices.

Funds in 2003 available to the Urban Stream Restoration Program total \$4.2 million with a grant cap of \$1 million. A local government agency and a non-government organization partnership is required. Various projects that would restore urban streams to their natural condition and control flooding, erosion, and/or solve other stream related problems would qualify for funding.

Application deadline has not yet been finalized but most likely it will be in the fall.

Previously funded projects include use of bioengineering to stabilize banks, channel realignment or concrete replacement, arundo removals, acquisitions, and stream clean-ups.

Program Managers can be reached as follows:

Urban Streams Restoration Program

Sacramento Headquarters: Sara Denzler, (916) 651-9625, [sdenzler@water.ca.gov](mailto:sdenzler@water.ca.gov)

Southern District: Susan Woolam, (818) 543-4630, [susanw@water.ca.gov](mailto:susanw@water.ca.gov)

Flood Corridor Protection

Sacramento Headquarters: Earl Nelson, (916) 654-3620, [enelson@water.ca.gov](mailto:enelson@water.ca.gov)

Bonnie Ross, (916) 654-4202, [bross@water.ca.gov](mailto:bross@water.ca.gov)

Southern District: Salomon Miranda, (818) 543-4660, [salomon@water.ca.gov](mailto:salomon@water.ca.gov)

Urban Streams Restoration Program:

<http://www.dpla.water.ca.gov/environment/habitat/stream/usrp.html>

Flood Protection Corridor Program: <http://www.dfm.water.ca.gov/fpcp>

**Steve Aceti** briefly introduced Prop. 40, a \$2.6 billion bond act that provides funds for a variety of programs related to water quality, coastal resources, and historical/cultural programs. For FY 02-03, funding from Prop. 40 was appropriated through the legislation and the budget process. The FY 03-04 budget, proposed in the beginning of January by Governor Davis, would appropriate additional Prop. 40 funds. No Prop. 40 funding legislation has been introduced for the current legislative session yet.

Steve summarized Prop. 40 funding by fiscal year as follows (for water quality and coastal resources in Southern California only):

FY 02-03. Watershed, Clean Beaches, and Water Quality Act (AB 2534 Pavely/Nakano) appropriated \$221.4 million to the State Water Resources Control Board (SWRCB) and the State Coastal Conservancy. SWRCB funded programs include: Clean Beaches Program --\$46 million (grants were solicited last October), Small Community Wastewater Program -- \$15 million, Urban Storm Water Program -- \$15 million, Non Point Sources Pollution Control Program -- 20 million, Agricultural Water Quality Program -- \$12 million, Integrated Watershed Management Programs -- \$57 million, and the Small Community Groundwater Program -- \$10 million. \$46.4 million was provided to the Coastal Conservancy's Watershed Restoration projects.

State Budget appropriations: Water Bond -- 1.2 million, Coastal Conservancy -- \$140 million (general programs), Resources Agency -- \$65.5 million, Dept. of Parks & Rec -- \$334 million, Dept. of Fish & Game (DFG) -- \$8 million, Cal. Conservation Corps -- \$4.7 million, Wildlife Conservation Board -- \$300 million, Santa Monica Mountains Conservancy (SMMC) -- \$12.2 million, Rivers & Mountains Conservancy (RMC) -- \$18.5 million, and Baldwin Hills Conservancy -- \$15 million.

FY 03-04 State Budget. Prop. 40 funds have been proposed as follows:

Coastal Conservancy -- \$26 million (includes \$4 million for Watershed Restoration projects), Water Bond -- \$2.3 million, Dept. of Water Resources -- \$4.6 million (Urban Streams

Restoration), Resources Agency -- \$7.9 million (River Parks), Dept. of Parks & Rec -- \$593 million, DFG -- \$8 million, CA Conservation Corps -- \$5.2 million, Wildlife Conservation Board --\$ 17 million, SMMC -- \$12.2 million, RMC -- \$13 million, Baldwin Hills Conservancy -- \$8.2 million.

**Mary Larson** described the mission of the Fisheries Restoration Grant Program as to protect and restore coastal salmon and steelhead trout habitat, while collaborating with stakeholders to provide environmental, cultural, and economic benefit to the state. There are no special requirements as to who qualifies to apply for this program. DFG has considered proposals for work in the subject areas of: in-stream habitat restoration, watershed and riparian habitat restoration, project maintenance for completed in-stream habitat, riparian habitat and watershed restoration projects, watershed evaluation, assessment, and planning, conservation easements that protect and improve water quality, effectiveness and implementation monitoring following project completion, watershed organization support and assistance, public school watershed and fishery conservation education, etc.

Funding available for 2003 amounts to \$15-\$20 million, and most likely another \$15-\$20 million for 2004. Prop. 13 and Prop. 40 are the main sources of funding for the DFG's Fishery Restoration Program. Some federal funds may become available through the Pacific Coastal Salmon Recovery fund.

Grants are awarded through a competitive Request for Proposals (RFP) process. It is anticipated that the next RFP will be advertised in February in the State Contracts Register at <https://www.cscr.dgs.ca.gov/cscr/default.asp>. Proposals would be due in May. Applicants would be notified by January 2004 whether their project was awarded. Contracts are usually for 24 months.

Information about the grant program and the annual RFP package can be viewed or downloaded from DFG's web site at [www.dfg.ca.gov/nafwb/fishgrant.html](http://www.dfg.ca.gov/nafwb/fishgrant.html).

Regional DFG fishery biologists and fish habitat specialists are available to provide technical assistance in the planning and development of project proposals. For tech assistance in the So California area contact Mary Larson at 562-342-7186 or [mlarson@dfg.ca.gov](mailto:mlarson@dfg.ca.gov).

**Enrique Arroyo** briefly described the history of the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy (RMC) as a State agency under the Resources Agency, created in 1999 to improve watersheds, provide for low-impact recreation, and restore and protect wildlife and habitat. Prop. 40 grant funding would be available through two grant programs: Large Grants with \$15 million available for park/open space acquisitions, habitat restorations, public access, environmental education, historical/cultural education, hydrological function, and multi-benefit projects serving a combination from above; and Small Grants with \$1 million available towards master planning, site planning, CEQA planning, project planning, interpretive panels/signage and kiosks, education, and multi-benefit projects.

Grant applications are due 4:00 pm on Monday, March 3, 2003. Successful applicants will be notified by June 30th. Proposals should be consistent with the Open Space Plan Common Ground principles and the Open Space Plan Phase II Final Report, which can be found on RMC's web site at [http://www.rmc.ca.gov/projects/projects\\_index.html](http://www.rmc.ca.gov/projects/projects_index.html). Eligible applicants would be cities, counties, districts, local agencies, joint powers, state and federal agencies, and non profits. Individuals and for profit organizations are not eligible. Multiple partners and/or joint projects are encouraged.

The RMC is currently hosting informational workshops. Workshop dates are January 21, 22, and 23<sup>rd</sup>.

For grant information contact Enrique Arroyo at 626-458-4315 or visit [www.rmc.ca.gov](http://www.rmc.ca.gov).

**Fran Spivy-Weber** introduced Prop. 50, the \$3.44 billion Clean Drinking Water, Coastal and Beach Protection Act of 2002, which was designed to be a 2-3 year spin-out bond. Senator Machado's bill SB 21 is one of the legislator's expressions of how the bond money will be spent. The Senate/Assembly Budget Committees are also expected to seek a leadership role in guiding the allocation of these funds. Funds will not be available before state budget is finalized.

This bond act is geared mostly towards drinking water quality. The following are preliminary allocations: Water Security -- \$50 million for monitoring and early warning systems, protective structures, emergency interconnections, and communication systems; Safe Drinking Water -- \$435 million for small system upgrades, treatment and contaminant removal, drinking water source protection, and revolving funds; Clean Water and Water Quality -- \$370 million for pollution prevention, reclamation, blending and exchange, river parkways that provide water quality benefits, Lake Tahoe water quality projects, clean beaches, and Sierra Nevada water quality projects; Contaminant and Salt Removal Technologies -- \$100 million for desalination projects and treatment projects for MTBE, arsenic, chromium, etc; CALFED Bay-Delta Program -- \$825 million for storage planning and studies, water conveyance, delta levee restoration, interim water supply reliability, ecosystem restoration, watershed protection, conservation and efficiency projects; Integrated Regional Water Management -- \$640 million for water supply reliability, storm water capture, wetlands restoration, pollution reduction, groundwater recharge, salt removal and reclamation, water banking and exchange, integrated flood management, and fish and wildlife enhancement; Colorado River -- \$70 million for canal lining and related projects and ecosystem restoration requirements; and Coastal Watershed and Wetlands Protection -- \$950 million for coastal watershed protection, SF Bay wetland protection and restoration, and So California wetland and watershed protection.

Stakeholders raised questions as to if the agencies, represented by the presenters, have a general plan that grant applicants can follow in preparation of their applications.

Shirley Birosik explained that the State and the Regional Boards are enforcing provisions of the Clean Water Act, and in order to do so there are a number of policy and plans in place. The Regional Boards have their Basin Plans that regulate the uses of the waters within the particular region. Grant programs follow the wishes and needs of the stakeholders who in most cases have developed watershed management plans.

Karen Bane suggested that the best guide for grant applicants would be WRP Regional Goals Report developed by each county Task Force where local top priority resources for the coastal watersheds and up stream areas are listed. The Coastal Conservancy has funded a number of watershed management and assessment projects, and implementation projects would be desirable for this grant cycle.

Susan Woolman responded that her agency would look at how projects fit in existing city plans.

Projects that fit into DFG's Strategic Plan or any existing plan that identifies a particular project as a high priority and fits DFG's goals and objectives would most likely be favored by the DFG's grant programs, Mary Larson explained.

Enrique Arroyo reconfirmed that the Open Space Common Ground Plan and Open Space Phase II Final report would be the guiding documents in preparation of grant applications.

It was also suggested to look at CALFED's plan at [www.calfed.water.ca.gov](http://www.calfed.water.ca.gov).

Presenters affirmed that it is very important to have multi-partner projects, and encouraged applicants to contact project managers for guidance.

Arthur Golding thanked everyone for attending the meeting and invited all to get involved in our consensus process to revitalize the watershed.
